Profile

Computer Science and Telecommunications student at NKUA with a strong technical foundation in AI, machine learning, and software engineering. Particularly interested in the business and strategic aspects of technology, from identifying market opportunities and shaping product direction to translating technical capabilities into viable business solutions. Enjoy taking ownership, communicating ideas, and driving initiatives in collaborative environments.

Education

National and Kapodistrian University of Athens Sep. 2022 – Present
BSc in Informatics and Telecommunications, 5th Year *Athens, Greece*

Universität Koblenz Apr. 2027 – Jul. 2027
Erasmus Semester in Computer Science *Koblenz, Germany*

Zanneio Model High School of Piraeus Graduated on June 2022
High School Diploma, Graduated with Honors *Piraeus, Greece*

Experience

Uni Systems Internship Jun. 2026 – Aug. 2026
AI Engineer Intern *Athens, Greece*

- Worked on AI engineering initiatives involving the development and application of AI-powered solutions.
- Designed and developed a reusable AI agent evaluation platform for pre-deployment quality assurance and post-deployment monitoring. The platform supports configurable evaluation metrics, automated test case generation, human review workflows, user feedback collection, and performance analysis across real-world scenarios.

UniAI (Non-Profit - Student Initiative) Oct. 2026 – Present
Expertise Associate *Athens, Greece*

- Contributing to the creation and curation of educational AI content, including workshops, talks, and presentations for the UniAI community.
- Collaborating on applied AI initiatives, contributing to project development, technical research, and the creation of educational resources.

Awards

AI Challenge Winner November 2025
Developer's Day by kariera.gr *Athens, Greece*

- Won first place in the AI Challenge competition, developing an innovative AI-based solution within limited time constraints.
- Designed and implemented a machine learning pipeline showcasing practical applications of artificial intelligence.
- Recognized among developers and industry professionals for creativity, technical skill, and presentation quality.

Snappi Challenge Winner — 5th Place Overall November 2026
4th Student Innovation Competition – NKUA *Athens, Greece*

- Won the Snappi challenge, "Autonomous Blockchain Orchestration Agent", developing a multi-agent blockchain system enabling communication and coordination between financial institutions.
- Contributed to business strategy and product development, exploring cross-bank applications including fraud detection and anti-money laundering.
- Took a leading role in the business pitching and product presentation, communicating the solution's value proposition, market potential, and technical vision to the judging panel.

Volunteer Work

Undergraduate Teaching Assistant Oct. 2024 – Feb. 2025
Department of Informatics and Telecommunications, NKUA *Athens, Greece*

- Assisted first-year students in the "Introduction to Programming" course with Unix, C language exercises and debugging.
- Held office hours to help students understand core programming concepts.
- Collaborated closely with the course instructor, discussing teaching approaches, course material, assignments, and lab exercises to enhance the learning experience.

ICTAI Volunteer November 2025
International Conference on Tools with Artificial Intelligence (ICTAI) *Athens, Greece*

- Volunteered at ICTAI 2025, contributing to initiatives promoting research and innovation in artificial intelligence.

Projects and Hackathons

Makeathon 2026 Participant May 2026
UniAI Makeathon 2026 *Athens, Greece*

- Developed HELIO, a machine learning-powered application for automated environmental risk assessment using satellite data.
- Project available on GitHub: github.com/KostasGeorgako/HELIO

TechBiz Hackathon Participant Mar. 2026
TechBiz Hackathon *Athens, Greece*

- Developed a tool leveraging satellite data to assist insurance agents in accurately calculating insurance premiums.

Makeathon 2025 Participant May 2025
UniAI Makeathon 2025 *Athens, Greece*

- Developed StyleEra, a fashion-focused AI app for virtual try-on and recommendations.
- Project available on GitHub: github.com/KostasGeorgako/StyleEra

Technical Skills

Programming Languages: C, C++, Python, SQL, Java
AI & Machine Learning: Machine Learning, Neural Networks, Model Training & Evaluation, scikit-learn, TensorFlow
AI Agents: AI Agent Development, Model Context Protocol (MCP), Agent Evaluation, Spec-Driven Development
Software Engineering: Algorithms & Data Structures, Systems Programming, Software Testing
Databases & Infrastructure: Relational Database Design, SQL Query Optimization, Linux/Unix, Cloud Computing
Developer Tools: Git, GCC, Visual Studio Code, Claude Code, Azure

Business & Leadership Skills

Product Thinking: Identifying business problems and translating them into practical technology solutions.
Strategic Thinking: Evaluating market opportunities, product positioning, and the business value of technology.
Business Communication: Pitching technical solutions, presenting value propositions, and communicating with diverse audiences.
Collaboration: Cross-functional teamwork across technical and non-technical roles.

Languages

English: C2 (Michigan Proficiency)
German: B2 (ÖSD Zertifikat)
Greek: Native
